Equipment experience	
5.Hobbies and interests	Animals, running , riding a bike, watching films, flowers
6.Job start date	01.12.2020

Autobiography

My name is Yuliia. I am 28 years old. I was born in Komsomolsk (now it's Horishni Plavni). I have a small but friendly family: father Vadym works for Ferrexpo Poltava Mining, he is an engineer in technical department and my mother Oleksandra is a cutter at the knitwear factory. She makes clothes. I am not married.

My height is 179cm, weight is 67kg.

During my childhood I have spent much time in the village ambience and as a result the country style became close to my heart. In a village live my grandparents and they used to keep a big livestock (two cows and calves, pigs, chickens, turkeys). I like animals and I always helped look after them.

I often went to my father at his workplace after school. I liked to observe his actions and got interested in his activity. So that after school I decided to go through the short-term course of Electrical engineering. I wasn't sure that it would be profession for all life and so that I didn't go to study on this faculty at the college and after finishing course I decided to try my hand on practice: I started working at Ferrexpo Poltava Mining in Production Department. I worked on computer with automatic system Wenco program.

In 2019 I decided to change the kind of activity and entered the Vocational Agrarian Lyceum on the faculty of veterinary and horticulture. In lyceum I realized that it's the field in which I want to develop. I like studying there. Especially I liked the practice which we did on the training farm. I was responsible for taking care of the animals, feeding and giving water to them, moving the animals, cleaning up the stables.

I have the satisfactory level of the English language. Also I speak Ukrainian and Russian. I have a driving license and can drive a car. As for my hobby I like teaching my dog different commands and I like sport especially running and riding a bike.

Now I'm looking for the internship abroad to get new knowledge, experience and improve my skills. I know that stockbreeding in Ukraine can be very perspective and I would like to make efforts for getting things in motion. Denmark is a progressive country with well-developed agriculture. So that, I would like to work at the pig-breeding farm.

Regards,

Yuliia
