Driver licence	
Equipment experience	
5. Hobbies and interests	Hiking in the mountains, working in the animal shelters, filmmaking
6. Job start date	03.11.2020

Autobiography

My name is Oleksandra. I am 26 years old. I was born in Dnipro. I have a small family. My mother works as a nurse in a private hospital. I am not married.

My height is 167 cm, weight 64 kg.

My grandparents had a small farm in the village and I helped them every summer. We usually had 20 pigs, 3 cows, chickens and turkeys. My grandfather taught me how to take care of animals and I can feed, wash, clean the cages. Now they lessened the amount of livestock because they don't grow animals for sale any more as it was earlier. When I have time I still visit them and help with looking after the household.

When I grew up, I realized that there are two branches in which I am interested most of all: agriculture and mechanical engineering. That's why in 2012 I started undertaking the short-term course in mechanical engineering. My studying was practically oriented. I got different useful skills and tried to apply them on practice. All my jobs were connected with this field, but I decided to master the sphere of agriculture too.

In 2019 I entered the Vocational Agrarian Lyceum on the faculty of veterinary and stockbreeding. I very quickly got engaged in learning activities. It appeared more interesting for me than my previous experience. In 2019 we had also the practice on the training farm. My responsibilities included taking care of the animals, feeding and giving water to them, moving the animals, cleaning up the stables.

I learnt the German language at school, but after finishing it I started learning English and can speak this language on the satisfactory level. Also I speak Ukrainian and Russian. As for my hobby I like hiking in the mountains with my team of friends and working with animals.

Now I want to get an experience in stockbreeding in Denmark, because there is a lot to learn from their approach to managing the agricultural sector. I believe that Ukraine is very rich for resources and my generation has to do all our best to bring agriculture to the decent standard. I would like to work on the dairy farm.

Regards,

Oleksandra
