# Autobiography

---

My name is Olena. I'm 23 years old. I was born in Cherkasy. My family consists of my father, my mother, my grandmother and me. My father Vitalii works at the factory as a foreman, my mother Iryna is a housewife and my grandmother Raisa is a pensioner. I'm not married, but I have a boyfriend.

My height is 163 cm, weight is 51 kg.

I grew up in a private house and my parents always had some arable land where we grew some vegetables and berries. But my grandparents once lived in the village near Cherkasy and they kept domestic animals. I helped my grandparents look after them: I fed them, gave them water, cleaned after them, grazed them. That's why I am used to basic activities regarding caring about cows and pigs.

In 2013 I started to study psychology. But soon I understood that it's not kind of activity which I would like to practice during my life. That's why I quitted studying and decided to look for my place in the world trying myself in different spheres. I worked at various places. I even worked in Poland at the grocery store. In the warehouse of the store I drove an electric car.

When I returned home and visited our village, our deserted house and barn, it was so pity for me. After that one idea appeared in my mind: I decided to renew our household and turn it into a small livestock farm with own production of honest goods. And I started with getting the appropriate education.

I entered the Vocational Agrarian Lyceum in 2019 and I am finishing it in 2022. I am studying on the faculty of veterinary and stockbreeding. Apart from lessons, we have also the practical training. I did the practice on the training farm where I had such duties as taking care of the animals, feeding and giving them water, moving the animals, cleaning up the stables.

I speak English and understand Polish. Also I speak Ukrainian and Russian. As for my hobby I like to dance and run in the morning, play table tennis.

Now I want to do the internship in Denmark in order to enrich my experience in agriculture. I want to know how all the processes go on a Danish farm in order to learn new things and use them in my professional activities. I want to work on the pig-breeding farm with my boyfriend, his name Vasyl.

Regards,

Olena.
